Wood Fence & Exterior Wood Stain Color Guide

Per the restrictions, and in keeping with the aesthetic intentions of the neighborhood, all exterior improvements (including color changes) require the submission of an Architectural Application for Improvement Review. To expedite your work, the following fence and wood stain colors have been pre-approved and do not require the submission of an Application for Improvement Review:

- Clear Stains
- Transparent Stains of the color families shown below
- Semi-Transparent Stains of the color families shown below. These colors are all within the "brown" color family.

Side and rear perimeter fences that border entrances or the surrounding roads (Blue Bell Rd, Gun & Rod Rd, and E. Stone St) are an exception to this. They may not be sealed or stained without ACC approval.

Any semi-solid or solid stain and/or any color outside those shown above require the submission of an Application for Improvement Review.
